SUMMARY

Information Technology engineering student with hands-on project experience in web development, backend systems, database management, and AI integration. Familiar with React, JavaScript, Python, Node.js, and SQL, with experience contributing to an AI-based customer support system and developing web applications.

EDUCATION

Bachelor of Engineering in Information Technology 2023 – Present | Ponda Goa
Shree Rayeshwar Institute of Engineering & Information Technology Shiroda, Goa

Higher Secondary Education (HSSC), *GVM'S Adarsh Higher Secondary School, Ponda, Goa* 2021 – 2023 | Ponda,Goa

Secondary School (SSC), *SSS Samiti's Lokmanya Tilak Vidyalaya Gurukul, Ponda, Goa* 2015 – 2021 | Ponda,Goa

SKILLS

Technical Skills

- **Programming Languages:** C, C++, Java, Python, JavaScript
- **Frontend Development:** HTML, CSS, React, Vite
- **Backend Development:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** MySQL, PostgreSQL, Firebase Firestore
- **AI Integration:** Google Gemini API, AI-Assisted Classification, Sentiment Analysis
- **Developer Tools:** Git, GitHub, Postman, Figma, Cursor AI
- **Software Testing:** Manual Testing, Functional Testing, Bug Identification
- **Core Concepts:** CRUD Operations, Authentication, Database Management

CERTIFICATION

Affective computing: **NPTEL —**Elite Certificate, 79% (Jan–Apr 2026)
Web Designing Competition: Institution's Innovation Council (2025)
ReactJS for Beginners Workshop: Institution's Innovation Council (2025)

PROJECTS

SupportSense AI – AI-Based Customer Support Ticket Management System 07/2026 – 09/2026
Persistent Systems Internship Project
Technologies: React, Vite, Node.js, Express.js, Python FastAPI, PostgreSQL, Google Gemini

- Contributed to a customer support ticket management system supporting ticket creation, tracking, and status updates.
- Worked with AI-assisted ticket classification, customer sentiment analysis, priority assessment, and response suggestions.
- Worked with a multi-service architecture integrating a React frontend, Node.js/Express backend, FastAPI service, and PostgreSQL database.
- Participated in functional testing of ticket management workflows and AI-assisted features.

Bug Tracking System , *Web Development Project | Firebase Firestone* 03/2026 – 04/2026

- **Technologies:** HTML, CSS, JavaScript, Firebase Firestore
- Developed a web-based application to create, manage, and track bug reports.
- Implemented CRUD operations and Open/Closed status tracking with dynamic UI updates.
- Designed a responsive dashboard to display and manage bug records.

Restaurant Reservation System, *Web Development Project* 11/2025 – 12/2025

- **Technologies:** HTML, CSS, JavaScript, MySQL
- Developed a web-based restaurant reservation application using HTML, CSS, and JavaScript.
- Integrated MySQL to store and manage reservation data and implemented CRUD operations for booking records.

Medication Reminder System, *Embedded Systems Project (Team Project)* 01/2025 – 03/2025

- **Technologies:** Arduino Uno, Buzzer, LED, OLED Display
- Collaborated on an Arduino-based medication reminder system using audio and visual alerts.
- Contributed to time-based alert logic, user interaction detection, circuit integration, and system testing.
